1. Understand what impassions YOU!  
What drives your engine?
2. Create a vision for where you want to go. People will only follow those who can 'see' and communicate vision.
3. Keep your eye on the goal. A little everyday will result in long-term wins!
4. Understand that not everyone is like you! Find out what motivates THEM!
5. Learn a new language: start observing those around you. What is their 'Language of Respect'?
6. Understand your own triggers: What causes you to lose your cool? Be in control of you!
7. Take care of yourself. Model self-care and time management to your people!
8. Take a risk: anything worth doing will not always be within the boundaries of your comfort zone. Feel the fear and do it anyway!
